

Retarus Messaging Services Overview

Retarus Desktop Fax Services

Critical Messaging Service Suite that provides a robust range of solutions that support corporation's faxing needs. There are a vast number of options available to send and receive faxes depending on customer's requirements. With native integrations into email clients – i.e. Microsoft Outlook, Lotus Notes – and our Office applications – i.e. Microsoft Word - users can fax business documents seamlessly from their desktop.

Desktop Services

- › **Mail2Fax.** Send faxes from any email system
- › **Fax-to-Mail.** Receive faxes directly to a desktop or applications
- › **Fax for Exchange/Notes.** Native integrated solution for Microsoft Exchange/Lotus Notes
- › **Faxolution for Windows.** Send fax from Microsoft Office or any other Windows application

Retarus Applications Fax Services

Retarus Faxolution for Applications integrates with any business applications such as CRM, ERP, or legacy to send critical messaging documents. With Retarus users can send and receive business critical documents and customer information directly from a business application.

Faxolution for SAP enables customers to send and receive business critical faxes directly to a SAP[®] system. Faxolution for SAP completely replaces in-house fax services and requires absolutely no hardware or software installation or maintenance. Certified by SAP, this service has the world's most SAP connections outside SAP itself

Retarus WebExpress

A Retarus service that provides a multi-modal web-based messaging broadcast tool. From WebExpress Marketing and Communications, Sales and Investor Relations can send broadcast messages to a distribution list via email, fax, and SMS in a matter of seconds. Through the Enterprise Administration Service portal, WebExpress Administrators have **live reporting** access to each campaign as they are being deployed.

Retarus SMS Services

Retarus Mail2SMS and **SMS for Applications** allow users to send information from an email account or application to a mobile device fast and easily. No hardware, software or gateway required. Messages will be received by Retarus' platform, translated and delivered in the appropriate format to a distribution list or recipient.

Retarus Managed E-mail

With Retarus Managed E-Mail Services, companies are protected by a multi-layer security technology that provides maximum protection against the most current viruses, malware and spam. In addition, we provide innovative functions that improve email usability, email management and corporate compliance.
